EDUCATION

Honours in Bachelor of Software Engineering (Sub major: Data Analytics)

Graduating Nov 2026

University of Technology Sydney (UTS)

- Current WAM: 85

SKILLS

- **Languages:** Python · MSSQL · HTML/CSS · MySQL · PostgreSQL
- **Libraries & Frameworks:** NumPy · Pandas · Matplotlib · Seaborn · Flask
- **Cloud & Data Platforms:** AWS · Snowflake · Supabase
- **Tools:** Tableau · Power BI · KNIME · Jupyter · Microsoft Office (Excel, Word, PowerPoint, MS Teams, Outlook)
- **Collaboration & Version Control:** GitHub · JIRA · Confluence

EXPERIENCE

LUME (PostgreSQL · TypeScript · Supabase)

Sept 2025 - Nov 2025

Software Developer (Internship)

- Designed and normalised 10+ relational database schemas in PostgreSQL, implementing primary, foreign, and composite keys to enforce referential integrity and manage scalable data architecture.
- Developed advanced SQL queries (JOINS, aggregations, subqueries) to support efficient multi-table data retrieval and backend reporting, enhancing query performance and reducing retrieval time
- Reduced data redundancy and enhanced data consistency by restructuring relational schemas, enhancing database efficiency and reducing storage overhead
- Generated and validated formulated test datasets to enforce schema constraints and enhance database reliability
- Developed backend application features using TypeScript and Supabase APIs, applying object-oriented principles and reusable design patterns to enhance system maintainability
- Collaborated using GitHub workflows, controlling feature branches, pull requests, and code reviews within an agile development environment

Lion King Flooring

Aug 2023 - Mar 2025

Operations & Technical Coordinator

- Coordinated end-to-end supply chain operations, analysing freight and inventory data to maintain zero stock-outs across high-volume contracts
- Optimised installation scheduling leveraging geographic and priority-based data, increasing operational throughput by 15% across 6–7 daily projects
- Led data-driven User Acceptance Testing (UAT) for a WordPress-to-Shopify migration, identifying 20+ functional gaps and validating system accuracy before deployment
- Supervised and reconciled multi-channel datasets (Shopify, eBay, WordPress), maintaining >98% data accuracy across pricing and inventory systems

RoboThink

Jan 2022 – Jan 2024

Technical Instructor (Robotics & Programming)

- Delivered formulated programming instruction in Scratch, Blockly, and Python to 15+ students per class, achieving a 90% project completion rate through adaptive curriculum design
- Directed the NSW Robotics Competition for 60+ participants, coordinating event logistics and formulating registration and scoring datasets
- Applied iterative problem-solving approaches to reinforce algorithmic thinking and foundational data structure concepts
- Analysed student performance metrics and delivered data-driven progress reports to stakeholders, tracking learning outcomes and development milestones

PROJECTS

Cloud Data Pipeline & Analytics Dashboard Project (AWS S3 · Snowflake · SQL · Power BI)

- Designed and implemented an end-to-end cloud data pipeline by ingesting organised datasets from Amazon S3 into Snowflake, deploying secure IAM role-based integration.
- Configured AWS IAM roles and updated trust policies to enable secure cross-platform data integration.
- Performed data transformations using Snowflake SQL, creating derived features (e.g., rainfall group classifications) to facilitate analytical insights
- Developed structured analytical datasets to support reporting and business intelligence use cases
- Integrated Snowflake with Power BI to create interactive dashboards, including multi-page analytical reports and rainfall trend analysis
- Published dashboards to Power BI Service, enabling cloud-based data visualisation and real-time stakeholder access

CERTIFICATIONS

Deloitte Australia Data Analytics Job Simulation on Forage

January 2026

- Completed a Deloitte job simulation involving data analysis and forensic technology
- Created a data dashboard using Tableau
- Used Excel to classify data and draw business conclusions

Udemy Data Engineering (SQL · Python · Docker · CI/CD · Airflow)

March 2026

- Built and automated an end-to-end data pipeline integrating API data extraction, PostgreSQL data warehousing, workflow orchestration with Apache Airflow, containerization using Docker, and automated testing & deployment with GitHub Actions CI/CD.

HONORS & AWARDS

1st Place | UTS iOS Hackathon (Tech Fest 2025)

- Awarded 1st place for developing “WakeUp,” an iOS application built using Swift and SwiftUI under competitive time constraints.

LEADERSHIP AND EXPERIENCE

UTS Personal Growth Society

July 2025 - Oct 2025

Events team subcommittee

- Brainstormed ideas for campus events and initiatives, and organised event logistics, including scheduling and on-the-day operations.
- Collaborated with committee members to delegate tasks, solve issues, and ensure events ran smoothly and on time.
- Arranged communications with students and stakeholders, and organised post-event follow-up, including collecting feedback and reporting outcomes.

UTS (Open Day)

Aug 2024 - Aug 2024

Student event volunteer

- Represented UTS as an event ambassador, providing a welcoming and engaging environment for over 20,000 attendees.
- Escorted visitors with wayfinding, program inquiries, and general event information at info points and session rooms.
- Managed attendee registration and check-in, utilising event-specific software to ensure a smooth process.
- Acted as the student face of UTS, contributing to the university's brand and fostering a positive experience for prospective students and families
